

### Professional Series

### Key Features:

- ▶ 10" woofer with 2" four-layer voice coil can provide higher power handling
- ▶ Linear suspension and vented pole piece design for woofer can effectively reduce the distortion and power compression
- ▶ Two 3" cone mid-range drivers, and two 3" cone tweeters for better vocal reproduction
- ▶ Precision engineered crossover can divide accurately and optimize three band frequency response
- ▶ The enclosure is constructed of MDF (Medium Density Fiberboard) with vinyl laminated finish
- ▶ Built-in protection circuit engineered specifically to protect the tweeter without interrupting the overall performance

### Applications:

The Ki110 is a 3-way full-range speaker designed specifically for KTV market needs. The Ki110 utilises a 10" woofer, two 3" cone mid-range drivers, and two 3" cone tweeters.

The 10" woofer features a non-pressed long fiber pulp cone with a foam surround providing necessary stiffness for long-lasting reliability, and the capacity to withstand the tremendous accelerating force generated by the magnetic energy of the motor structure. Two 3" cone mid-range drivers matched with two 3" cone tweeters enhances the performance in the mid-range and high-frequency range and provides perfect fidelity to meet KTV audio system needs.

The Ki110 is designed to handle 150 watts of continuous power. The enclosure is constructed of MDF with vinyl laminated finish and fitted with nickel plated binding post for reliable connectivity. Two high-strength MIO attachment points guarantee the stability of suspension.

The integrated grille, with elaborate design, adds a distinctive element to the overall elegant appearance of the loudspeaker in addition to protecting the components from damage.
